## WORK EXPERIENCE

### Frontend Engineer
### heycar - Mobility Trader GmbH

*10/2019 – Present*                                                                *Berlin*
*Achievements/Tasks*

- Moved portal for car dealers into a separate micro-frontend
- Built dashboard analytics for car dealers using redux-saga for data flow and canvas for IE compatible data visualizations
- Helped build and maintain a shared component library for heycar with React storybook
- Simplified custom SSR configuration on heycar webapp
- Implemented redux cacheing for various filters and features to eliminate the need for repeat API requests combined with generator function based cache invalidation strategies
- Implemented reusable api calls that abort unnecessary inflight ajax requests
- Implemented strategies for delaying loading spinners to improve UX
- Created a new UI to help heycar rollout to a new leads reporting pricing model

### Frontend Developer
### OSK Berlin GmbH ☑

*06/2017 – Present*                                                                *Berlin*
*OSK Berlin develops websites, apps, and other tools for multinational corporations and small businesses alike*
*Achievements/Tasks*

- Rebuilt the media portal site for a major international client using Angular 4 - 8
- More than tripled portal's Google PageSpeed Insights score in less than 3 months
- Built a data collecting and product finder using React/Redux in less than 3 weeks
- Built coupled and decoupled Drupal based sites
- Built reusable UI and website components for various major international clients
- Built and maintained other websites / hybrid iOS + Android apps

### Software Engineer
### Jovoto GmbH ☑

*11/2016 – 05/2017*                                                                *Berlin*
