Kubernetes

Cypress

WORK EXPERIENCE

Senior Software Engineer

Utopia Music AG

10/2022 - Present

Berlin (remote)

Utopia uses data and applications to ensure musicians are paid fairly.

Achievements/Tasks

- Wrote detailed end-to-end C4 architecture diagrams and RFCs to plan out a new admin application
- Collaborated with designers, product, and frontend engineering team to build a React component library
- Using Remix.run to help build a highly performant SSR React customer facing application
- Implemented code coverage and web accessibility checks into the CI pipeline
- Optimized MongoDB collection structure to improve database performance and, as a consequence, a faster end-user experience
- Added a search + drag and drop feature to allow admins to create and curate a list of trending artists/companies/music industry people visible that is ultimately displayed to end users

Contact: Adam Watson - adam@adamwatson.com

Senior Software Engineer

Zapp

12/2021 - 09/2022

Berlin (remote)

Zapp allows users to order groceries and household essentials 24/7, and have them delivered in 20 minutes.

Achievements/Tasks

- Built functionality to allow users to reorder past orders in the mobile app.
- Created monorepo to house shared configuration between frontend / backend apps.
- Helped setup e2e testing in the mobile apps using Detox.
- Setup frontend cacheing on Google addresses, which reduced the Google Maps Api bill.
- Built state machine to handle complex post delivery / previous order feedback surveys.

Senior Frontend Engineer

heycar - Mobility Trader GmbH

10/2019 - 11/2021

Berlin

Heycar empowers customers throughout Germany to purchase high-quality used cars.

Achievements/Tasks

- Moved portal for car dealers into a separate micro-frontend.
- Built dashboard analytics for car dealers using Redux-Saga for data flow and canvas for IE compatible data visualisations.
- Helped build and maintain a component library for heycar with React Storybook.
- Simplified custom SSR configuration on heycar web app.
- Implemented redux caching and cache invalidation strategies for various UI filters and features. This sped up the UX and eliminated the need for repeat API requests.
- Implemented reusable api calls that abort unnecessary inflight AJAX requests.
- Implemented reusable React hooks / Redux Sagas for delaying loading indicators to improve UX.
- Created a new UI to help heycar rollout to a new leads reporting pricing model.
- Refactored the portal for car dealers to use client-side rendering with routing served by AWS Lambda and assets served by AWS S3 and Cloudfront. Setup infrastructure deployments and changes with Terraform.
- Moved the styling strategy of the main web app to using theming, making future rebranding efforts easier.

WORK EXPERIENCE

Frontend Developer

OSK Berlin GmbH

06/2017 - 09/2019

Berlin

OSK Berlin develops websites, apps, and other tools for multinational corporations and small businesses alike

Achievements/Tasks

- Rebuilt the media portal site for a major international client using Angular 4 - 8.
- Built advanced autocomplete search functionality into media portal using RxJS for frontend optimisations and elastic search on the backend
- More than tripled media portal's Google PageSpeed Insights score in less than 3 months.
- Built a data collecting and product finder using React/Redux in less than 3 weeks.
- Built coupled and decoupled Drupal based sites.
- Built reusable UI and website components for various major international clients.
- Built and maintained other websites / hybrid iOS + Android apps.

Software Engineer

Jovoto GmbH [↗](#)

11/2016 - 05/2017

Berlin

Jovoto offers a crowdsourcing platform that connects companies with creative individuals around the world

Achievements/Tasks
