WORK EXPERIENCE

Senior Frontend Engineer Gigs GmbH

02/2023 - Present

Berlin, Germany

Gigs is the easiest way to offer wireless subscriptions for smartphones & wearables.

Achievements/Tasks

- Implemented Sentry issue tracking and replay videos, integrating them with Slack notifications to inform the team of incoming issues, errors, or performance regressions.
- Collaborated on designing and implementing a new feature using the NX monorepo, enabling customers to upgrade phone plans via either the customer-facing portal or admin dashboard on these NextJS apps.
- Developed features allowing customers to add data to their existing plans.
- Assisted in the implementation of a new public-facing site, utilizing the NextJS app router with React Server Components.
- Led a Spike investigation on the usability and ergonomics of API endpoints for upcoming features.
- Introduced the Sanity Content Management System (CMS) into the consumer-facing application, enabling quick and dynamic content updates.
- Migrated the existing infrastructure to Google Cloud Platform (GCP) using Terraform.
- Enhanced the health and reliability of the analytics in the customer-facing app.
- Strengthened the robustness of unit tests (Jest), integration tests (React Testing Library + MSW), and E2E tests (Cypress).
- Introduced E2E tests into the admin application.

Senior Software Engineer Zapp

12/2021 - 10/2022

Berlin (remote)

Zapp allows users to order groceries and household essentials 24/7, and have them delivered in 20 minutes.

Achievements/Tasks

- Built functionality to allow users to reorder past orders in the mobile app.
- Created monorepo to house shared configuration between frontend / backend apps.
- Helped setup e2e testing in the mobile apps using Detox.
- Setup frontend cacheing on Google addresses, which reduced the Google Maps Api bill.
- Built state machine to handle complex post delivery / previous order feedback surveys.

WORK EXPERIENCE

Senior Frontend Engineer

heycar - Mobility Trader GmbH [↗](#)

10/2019 - 11/2021

Berlin

Heycar empowers customers throughout Germany to purchase high-quality used cars.

Achievements/Tasks

- Moved portal for car dealers into a separate micro-frontend.
- Built dashboard analytics for car dealers using Redux-Saga for data flow and canvas for IE compatible data visualisations.
- Helped build and maintain a component library for heycar with React Storybook.
- Simplified custom SSR configuration on heycar web app.
- Implemented redux caching and cache invalidation strategies for various UI filters and features. This sped up the UX and eliminated the need for repeat API requests.
- Implemented reusable api calls that abort unnecessary inflight AJAX requests.
- Implemented reusable React hooks / Redux Sagas for delaying loading indicators to improve UX.
- Created a new UI to help heycar rollout to a new leads reporting pricing model.
- Refactored the portal for car dealers to use client-side rendering with routing served by AWS Lambda and assets served by AWS S3 and Cloudfront. Setup infrastructure deployments and changes with Terraform.
- Moved the styling strategy of the main web app to using theming, making future rebranding efforts easier.

Frontend Developer

OSK Berlin GmbH

06/2017 - 09/2019

Berlin

OSK Berlin develops websites, apps, and other tools for multinational corporations and small businesses alike

Achievements/Tasks

- Rebuilt the media portal site for a major international client using Angular 4 - 8.
- Built advanced autocomplete search functionality into media portal using RxJS for frontend optimisations and elastic search on the backend
- More than tripled media portal's Google PageSpeed Insights score in less than 3 months.
- Built a data collecting and product finder using React/Redux in less than 3 weeks.
- Built coupled and decoupled Drupal based sites.
- Built reusable UI and website components for various major international clients.
- Built and maintained other websites / hybrid iOS + Android apps.

Software Engineer

Jovoto GmbH [↗](#)

11/2016 - 05/2017

Berlin

Jovoto offers a crowdsourcing platform that connects companies with creative individuals around the world

Achievements/Tasks

- Rebuilt the application's frontend with React/Redux.
- Tested and implemented features with Ruby on Rails.

Frontend Developer

GoVios GmbH [↗](#)

09/2016 - 11/2016

Hamburg

Achievements/Tasks

- Developed UI and overall applications that provide solutions for the cruise ship industry
- Created reusable React components for the platform
- Built out frontend features using React and Redux

WORK EXPERIENCE

Software Engineer

Cloud Logistics [↗](#)

03/2015 - 05/2016

West Palm Beach, FL

Achievements/Tasks
